## RENTALS SALES SERVICE

Reliable Instruments.  
Meaningful Data.™

When you need to filter your samples, trust the QED brand QuickFilter®!

This 0.45 micron disposable groundwater sampling filter cartridge certifies the highest level of quality on the market with both independent lab analysis and the remarkable polyethersulfone membrane, which makes your dissolved metals testing process faster, easier, and more reliable!

Equipco understands that quality is essential to reliable, accurate results. QuickFilter® is manufactured within a tight specification range to ensure a uniform pore structure for low binding applications where reliable fast flow rates and high throughputs are required.

Cartridge filters may look alike, but be careful to compare media type, surface area and the fine print of the purity verification program. Only QuickFilter® delivers the full premium package, at no extra charge!

### Transfer Vessel Specifications

- Capacity: 1100mL
- Height: 12.63 in.
- OD: 5.25 in.
- Weight: 3 lbs.
- Max pressure: 125 psi

# QuickFilter®

In-Line Groundwater Sampling Filter  
0.45 micron High Capacity

400X magnification of QuickFilter membrane

For maximum sample purity, QuickFilters® are manufactured with no adhesives, sealants, potting compounds, or other foreign materials.

QED QuickFilter® cartridges are batch-checked for purity by an independent analytical laboratory. A number of programs have traced false positives and other analytical errors to the use of "off-brand" filters.

### Features

- Maximum flow capacity
- Accurate particle size cutoff
- Accurate even in highly turbid waters
- Assured purity avoids sample contamination

### Specifications FF8200 / QF045

- Pore size 0.45micron
- Filter area 609 cm<sup>2</sup>
- Filter material Polyethersulfone
- Max. pressure 60 psi (4.1 bar)

### Prices

- Discounts available for quantity orders
- FF8200 QuickFilter® 0.45 micron \$15.75 ea.
- FF8500 Transfer vessel w/hand pump \$140.00
